<b>OVERALL TOTAL</b>	<b>179</b>	<b>290</b>	<b>61.7 %</b>	<b>Partially Supportive</b>
----------------------	------------	------------	---------------	-----------------------------

The scores that you see on this page are based on data you have entered (and saved) to date. Your community's score will start at zero until you begin entering data on your NEAT. These scores are preliminary until you successfully finalize your NEAT. Upon successful NEAT finalization, these scores become final.

Please note that the highest possible score for some sections can vary based on your answers. For example, some scoring adjustments occur if you have less than three worksites in your community. The rationale for these adjustments is to avoid penalizing communities that do not have as many worksites within the community as other communities.

Also note that in addition to your scores and a calculation of "% of Possible," your community also receives a "Support Rating" for each NEAT factor (that is, each aspect of your community measured by NEAT that could support healthy eating). NEAT Support Ratings are based on the "% of Possible" (your score divided by the maximum possible score for each sub-section or section of the NEAT). Support Ratings are defined as follows:

- 90% to 100% - This aspect of your community is **Fully Supportive** of healthy eating.
- 75% to 89.9% - **Mostly Supportive** of healthy eating
- 50% to 74.9% - **Partially Supportive** of healthy eating
- less than 50% - **Not at all Supportive** of healthy eating

We welcome your feedback on the NEAT assessment and website. Please send your suggestions to [shalfma@mphi.org](mailto:shalfma@mphi.org).
